SOUTHWORTH

INCREASE WORKER PRODUCTIVITY AND PROFITS WITH IMPROVED ERGONOMICS

THE MAN/MACHINE
INTERFACE PAYOFF
Published 1972

When we began writing about Ergonomics 50 years ago, we were simply attempting to bring a more scientific perspective to a common sense issue. If you consider the capabilities and limitations of the worker in the design of the workplace, the worker will be more productive and that productivity contributes to profit.

At the time we had no idea that the topic of ergonomics would become so widely discussed, by so many people, in so many professions, with so many agendas. Despite all of the politics and hoopla, our view today is the same as it was decades ago. The practical application of ergonomic principles is a core business proposition. Yes, it is about reducing worker fatigue and the risk of worker injury, which are very worthwhile objectives. However, the real desired benefit driving factory or warehouse investment is increased productivity and an improved bottom line. That's what an investment in practical ergonomics produces and that is the point we have been making for decades.

Southworth® is proud to offer more products that improve productivity than any other materials handling company. The following pages have specific products and descriptions of how they can improve your company's bottom line. For more information please call us at 800-743-1000 or visit www.SouthworthProducts.com.

TABLE OF CONTENTS

The Industry's Broadest and Most Comprehensive Line of Lifting and Positioning Equipment

Lift Tables	4-5
Low-Profile Lifts, Levelers, and Tilters	6-7
Portable Lifts	8-9
Turntables	10
Custom Platforms & Finishes	11
Pallet Handling	12-13
Container Handling	14
Tilting & Upending	15
Worker Platforms	16-17
Facility Lifts	18
Engineered Solutions	19

Lift Tables

Improve Productivity While Reducing the Risk of Worker Injury

Positioning the work is easier, safer, and much more productive than positioning the torsos of workers. The elimination of lifting, bending and reaching is made possible by vertical adjustment to an infinite number of positions within a lift's working range. The addition of various options can provide an added measure of improvement to specific applications.

There are literally hundreds of uses for lift tables in manufacturing, warehousing and distribution facilities. The addition of these inexpensive devices makes the work faster, safer, and easier.

Some typical applications include: machine feeding and offloading; product assembly; inspection; quality control; repair; feeding and offloading conveyors; and bridging different conveyor levels. There are many other applications requiring heavier capacities, extreme load dimensions, and higher vertical travel.

Whatever the lift requirements, incorporating specification rich, high-quality Southworth lift tables always makes the work environment safer and more efficient.

Backsaver Lifts™

Over one million configurations available.

Pneumatic Lift Tables

For use anywhere shop air is available.

Backsaver Lite™ / Backsaver Compact
 For lower capacity requirements 500 - 1500 lbs.

Heavy-Duty Lifts
 Lift loads up to 25,000lbs. with ease.

Spacesaver Lifts™
 Extended vertical travel.

Tandem Lifts
 Extra long and extra wide platforms.

Low-Profile Lifts, Tilters, and Levelers

Load and Unload them with ordinary hand pallet trucks

Some lifts, levelers, and tilters require interface with carts, handtrucks, palletjacks and other floor height transporters. Pit mounting is an excellent option but, often circumstances do not allow for pit mounting traditional lift tables. Fortunately, Southworth offers an extensive array of specialty lift tables designed to accommodate any type of transporter.

They include tables with:

- Roll-On accessibility
- Roll-Over accessibility
- Roll-In accessibility
- Roll-Up accessibility

For details, request our Low-Profile Lifts catalog.

Incorporating these special-use, low-profile devices into many applications provides all of the benefits of vertical positioning and lifting which makes workers more productive.

Pit Mounted Lift Table

The base sits below floor level so that when lowered it is flush with the floor.

Floor Height Lift Tables

Lowers to floor level for loading with a hand pallet truck.

LIFTMAT™ Lift Tables

Four side access to loads with no reachover. Ramp option for hand pallet truck accessibility.

LIFTMAT™ Lift Turntables

Integrated turntable spins loads for easy access without reaching across or walking around the lift.

Roll-In™ Level Loader

For use with open bottom pallets. Provides four-side access. Choose "E" or "U" shape styles.

Roll-on™ Level Loader

Hand pallet truck accessible. Turntable option available.

E-Z Reach™ Universal

Hand pallet truck accessible, works with all containers.

Mast Style Lifts

Access parts in totes or small bins. Choose forks or platform.

Portable Lifts

Effortlessly Lift and Move Objects in the Lab, Plant or Warehouse

In virtually every plant, shop, stockroom, warehouse, or office there is a need to transport materials, equipment and supplies with a minimum of lifting. Employees risk injury by carrying loads from one location to another, or from lifting them from the floor to a workbench or shelf. Lifter/transporters combine two functions in one machine to do the job faster and safer.

Southworth's variety of transport equipment is designed to meet the widest range of application needs and includes:

- Practical and economical foot pump units
- Double scissor units to lift loads over 5'
- Mechanical units, ideal for clean environments
- Power drive units for long distance travel
- Fork platform models for handling pallets/skids

For more details, request our Dandy Lifts, Lift Table or Pallet Handling catalogs.

Sliding boxes off of pallets, workbenches, or shelves onto lifter/transporters eliminates lifting. Once loaded they move easily around the plant, even in tight spaces where a forklift could not go. Loads can then be vertically positioned for easy offloading. Workers are more productive, fatigue is reduced and the risk of injury is minimized.

Backsaver Lite™ Portable

Available in manual or powered drive.

Dandy™ Lift Lifter/Transporter

Load transporters with foot pump or battery lift. Vertically position loads up to 1,700lbs.

Dandy Leveler™

Spring mechanism automatically adjusts for level feeding/offloading.

Lift-Tool

The portable lifting, positioning, and assembly tool. Raise or lower it with an ordinary cordless drill.

Stack-N-Go™ Powered Stackers

Compact power driven stackers in straddle or fork over configurations.

Pallet Transporters and Stackers

Lift, position and transport with a single unit. See Pallet Handling section for details.

Turntables

Make Standard Lifts Even More Productive by Improving Access to the Load

Turntables and lifts with integrated turntables make many common production, assembly, and packaging jobs faster, safer, and easier. Southworth offers a variety of turntable options to suit any requirement.

They include:

- Top mounted turntables that sit on top of lift tables or fixed height platforms
- Floor mounted turntables which are permanently fixed to the floor for dedicated operations
- Powered turntables that rotate 360° at the touch of a button
- Lifts with built-in turntables that sit flush to the lift platform
- Portable pallet turntables designed to rotate pallets for near side loading and unloading

Walking around loads on platforms, pallets or even directly on the floor presents a number of productivity and safety issues. Turntables allow workers complete 360° access to items while remaining in the same location. As a result, workers have better access to tools and work, improving the quality and productivity of their work.

Powered Turntables

Rotate heavy loads 360° at the touch of a button.

Non-Powered Turntables

Available in "top mount" or "flush mount" configurations.

Pallet Turntables

Sit directly on the floor. Easily moved or relocated.

Custom Platforms & Finishes

Products Configured Specifically for the Application

Southworth offers custom lift table platforms designed to simplify feeding, off-loading, transferring, repositioning or reorienting work to the most comfortable position and angle. There are scores of available configurations. A few of the most common include:

- Tilt tops that position loads at any angle from 0° - 85°
- Moving tops via rollers, belt, or ball transfer for conveying or positioning work
- Special finishes and materials of construction for environmental, security or aesthetic circumstances

The addition of a custom platform or top to a standard lift table can have a dramatic effect on the bottom line. Whether used for getting work to and from the worker faster, or to reposition loads for maximum access and worker comfort, productivity gains are significant.

Better Angles

Tilt loads up to 85°. Choose hydraulic or pneumatic. Mount on floor, fixed height platform or lift.

Better Flow

Transfer tops for assembly applications or moving loads between two levels.

Special Finishes

A variety of top materials, finishes and full construction for washdown and other special environments.

Pallet Handling

Load Pallets Quickly and Safely Without Lifting, Stretching or Walking

More items are shipped on skids or pallets than all other packaging methods combined. Loading and unloading them is backbreaking, time consuming work. SouthworthPalletPal® Products speed and simplify the process, safely increasing the amount of goods that can be shipped or received every day.

Nearly three decades ago, Southworth introduced the original PalletPalLevelLoader for manual pallet loading and unloading. Since then, our pallet handling line has grown to include:

- Spring and air actuated units
- Roll-On and Roll-In units for use with hand pallet trucks
- Portable Turntables
- Mobile Levelers
- Pallet Stackers for storage access
- Pallet Rotators/Inverters for load transfers

For more details, request our PalletPal catalog.

Maintaining a constant working height and nearside access allows workers to load and unload pallets quickly and easily, expending minimum effort while avoiding the risk of injury. Rotators eliminate nearly all manual restacking.

PalletPal® 360° Automatic Level Loaders

The automatic load levelers that started a revolution. Available in mechanical or pneumatic.

PalletPal® Pallet Inverters

Rotates in seconds. Replace broken pallets; transfer to in-house/shipping pallets/slip sheets.

Roll-on™ Level Loader

Hand pallet truck accessible. Workers raise or lower platform as layers are added or removed.

Roll-on™ with Turntable

Built-in turntable allows operators to spin the load for nearside loading/unloading.

PalletPal® Walkie

Spring Level Loader works with powered pallet trucks for order picking efficiency.

PalletPal® Mobile Leveler

Use as a transporter, feeder, or work positioner. Powered lift.

PalletPal® Lift Truck

A palletizer and transporter in a single unit with powered lift.

PalletPal® Disc Turntables

Rotate loads for nearside access. Hand pallet truck accessible.

Container Handling

Tilt Baskets for Access to Contents Without Bending, Reaching, or Stretching

Accessing parts in containers is one of the most significant productivity thieves in any manufacturing or assembly operation. Southworth container tilters improve productivity and safety by positioning baskets so that parts are easily accessible without bending, stretching, or reaching. Southworth offers more models and configurations of container tilters than any other manufacturer.

- Capacities up to 4,000 lbs
- AC or DC power
- Hand pallet truck accessibility
- Independent control of lift and tilt

For more details, request our Container Tilter Catalog.

In almost every case we've ever seen, production machines work faster than the people feeding them. Getting parts to machines faster not only increases worker productivity, it increases machine productivity, improving R.O.I. and shortening the amount of time it takes for production equipment to "pay for itself", while always improving the safety of the worker.

E-Z Reach™ Portable

Our most popular, versatile tilter. Choose AC or DC power.

E-Z Reach™ Lift & Tilt

For precise positioning of height and angle.

E-Z Reach™ Universal

Hand pallet truck accessible, works with all containers.

Tilting & Upending

Tilt Loads for Improved Access, Tilt or Reorient Rolls and Coils

Tilters and upenders perform a variety of important tasks in all types of manufacturing and processing facilities. When loads need to be reorientated or positioned for better access, upenders fit the bill. For positioning large rolls of paper, film or foil, roll handling tables can be used to feed at one end of a line or take away at the other end. Southworth products are available in several configurations to suit the platform, tilt angle and capacity requirements of any application.

Reorienting work or material between horizontal and vertical positions should only be attempted with equipment that truly secures the load. Otherwise, there is a risk of time consuming production bottlenecks as well as an increased risk of injury. By incorporating tilters or upenders into the process, work flows quickly, smoothly and safely.

Upenders

Reorient heavy loads 90°.

Roll Handling Tables

Lift and position heavy rolls.

Customized Upender

A custom designed upending device used for appliance assembly.

Worker Platforms

Position Workers Without the Risks or Hassles of Ladders and Scaffolding

For assembly or maintenance operations where large structures, such as aircraft or heavy equipment, must be accessed at elevated or varying heights, Southworth offers custom configured lifts that can be designed or retrofitted into most operations. More flexible and safer than scaffolding or ladders, these worker platforms are also appropriate for stock picking from vertically stacked compartments of storage carousels or rack systems.

With the industry's longest history and greatest experience, we offer stable lifts in stationary or movable configurations in a multitude of platform sizes and lifting ranges, working with the customer to accommodate budgetary limitations as well as unique, application-specific requirements.

Avoiding the risks of ladders and the hassles of scaffolding while gaining the speed, flexibility and security of a powered platform creates a more productive and safer work environment.

Options include:

- Indexed positioning
- Slide-out ramps and bridges
- Fixed or adjustable gates and hand rails
- Custom deck treatments
- Custom controls

Manufacturing/Assembly Platforms

Provide safe, convenient access to large equipment at varying heights.

Elevating Platforms with Integrated Lift Stations

Main platform travels up/down to pick items. Lift stations adjust height for working with picked loads.

Carousel Access Platforms

Installed at horizontal carousels to provide access to items in higher storage locations.

Floor-to-Floor Lifts*

Safe, convenient access to mezzanines or raised platforms.

Facility Lifts

Facility Lifts for Stand-Alone or Integrated Systems

In addition to work positioning lifts, Southworth manufactures a full line of facility lifts. As stand-alone units or as part of an integrated material flow system, these products simplify the task of getting items into and out of the building, as well as accessing storage and inventory areas.

- Dock Lifts provide access between trucks with varying bed heights and loading docks or to grade level
- Floor-to-Floor lifts move loads quickly and easily between building levels providing access to, and better utilization of, mezzanines or second floors
- Maintenance lifts move production equipment between floors for service, or can bring the service equipment up and down as required

The up and down movement requirements in facilities are endless and Southworth equipment provides opportunities to improve production flow and worker safety in any facility.

Medium-Duty Dock Lifts

Access any truck or dock height. Available in 5,000, 6,000 and 8,000 pound capacities.

Heavy-Duty Dock Lifts

Suitable for use with loads up to 20,000 lbs. Platform sizes up to 8' x 12' available.

Air Cargo Lifts

Inverted caster deck for easy handling of air cargo containers and Unit Load Devices (ULDs).

Engineered Solutions

Custom Lifting, and Positioning Equipment for Dedicated Applications

Southworth has designed, engineered, built, and installed lifts for almost every application imaginable. If we can't satisfy your needs with a standard product, we have the ability to modify a lift or even design a new one specifically for you.

Southworth has more engineers and a longer history than any other lift table manufacturer. When an application is encountered that requires custom equipment, they work closely with the user to make sure the best possible solution is used. Although there isn't much they haven't seen, they remain dedicated to a philosophy of innovation and accommodation.

- Years of engineering knowledge
- State-of-the-art 3D CADD system
- Complete coordination to your application

Coil Cars

Handle jumbo rolls and coils up to 70 tons.

Container Unloaders

For automatic unloading of a variety of containers.

Roll Handling Systems

Roll handlers, shaft pullers and transporters.
